

Senior Web Developer (01/01/06)

Circulent is a leading technology integration company providing a life cycle of services including systems integration, network security, web development, collaborative groupware, and interactive marketing.

We are seeking an experienced Senior Web Developer with graphic design experience to join our software development team. All candidates must have significant professional experience developing PHP-MYSQL applications. This is a challenging position and is not suitable for novice or entry-level programmers.

Responsibilities

- Proven experience architecting PHP-based web applications using a MYSQL backend database
- Manage the entire web development cycle: Requirements gathering, documentation, database architecture, development, testing (QA/Staging), production builds, and bug fix/enhancement builds
- Partner with the business teams for design and business related strategies
- Design and develop creative components for multiple client web sites (i.e. Graphics & multimedia)
- Provide ongoing maintenance of client websites (i.e. bug fixes and enhancements)
- Interact with the client to identify and document functional requirements
- Support development, QA, staging, and production Win2K/NT/XP/2003/Linux server environments
- Participate in leading idea sessions and the possible development and execution of those ideas (i.e. lifestyle environments, shopping experiences, new sites, etc)
- Experience with building, managing, and coaching a team of web developers
- Creating, implementing, and enforcing release management processes

Technical Qualifications

- Professional experience developing/architecting PHP-based web applications
- Familiar with using release management software such as Microsoft SourceSafe
- Advanced working knowledge of Adobe PhotoShop/Illustrator, Macromedia Flash/Fireworks/Director
- Advanced knowledge of web protocols and programming requirements
- Administration experience with IIS, Microsoft Win2K/98/NT/XP/2003 (Linux & Apache are a plus!)
- Knowledge of multiple programming languages including PHP, SQL, HTML, XML, CSS, DHTML, JavaScript. (ASP, Java, PERL, and Visual Basic are a Plus!)
- Experience working architecting MYSQL databases across a web application (Other RDBMS such as Oracle, Sybase, and SQL Server are a plus!)
- Proven experience designing browser-based GUIs, writing usability tests, and incorporating user feedback

Professional Qualifications

- 5+ years experience as a professional software developer in a live production or consulting environment.
- 2+ years experience as a manager of a web development group is desired
- B.A. or B.S. in Computer Science or equivalent experience
- Ability to quickly grasp and integrate emerging technologies
- Ability to plan, organize, and manage time across multiple tasks and projects.
- Consistently manage and resolve all application support requests in a timely and successful manner
- Ability to represent the organization with a professional approach and manner with clients
- Ability to interact effectively with both technical and non-technical personnel
- Ability to self-manage and operate independently with little supervision
- Has excellent project management skills, high level of personal organization, and prioritization skills
- Excellent verbal and written communication skills with team members, management and customers
- A strong ability to multitask, own and execute, and follow through on all technical and business issues

For immediate consideration, qualified candidates interested in joining our professional team should send resume and salary requirements, and answers to the following questions to hr@circulent.com. Note: US Citizen, Green Card holders, and local candidates only need apply. No third parties please. This is a contract role with an opportunity to become a salaried employee plus benefits.

1. Are you current working at a company (not consulting or looking for work)?
2. If you are not working, why did you leave your position?
3. What was the salary or hourly rate at your last position?
4. List at least (3) PHP/MYSQL driven sites you have developed.
5. List at least (3) sites where you have contributed in the development of graphic design and multimedia components.
